AFRICA FERTILIZER.ORG 2020 SPONSORS

AGI is a global leader in the planning, engineering and manufacturing of full solutions and systems across 5 platforms: Grain, Fertilizer, Food, Feed and Seed. We partner with our customers on 6 continents to leverage the AGI advantage and engineer unique market specific systems.

AGI produces custom blending and conveying equipment for industrial and fertilizer applications in a variety of capacities. The Yargus equipment line includes premium batch blending and material handling for dry materials, including declining weight systems, tapered vertical blenders, rotary drum blenders, towers, bucket elevators, and multiple conveying options.

EMT specializes in the development and production of blending and bagging equipment. EMT is established in the Netherlands, with a selling and servicing network by means of representatives in other European countries. Besides their own products, EMT supplies equipment made by Doyle Manufacturing (USA).

EMT manufactures the Weighcont Industrial and Volcont blending machine types, and offer the following Doyle products: the Shamrock, Vertical, Smithbuilt, Kraus, and Tyler Blender lines.

Bagtech started its journey in the 80's in African agribusiness industry, and currently it counts on more than 90 successful projects delivered and more than 40 consulting & services offered across Africa and the world. All Bagtech machines are supplied with artificial intelligence control created in partnership with Festo in order to provide live and online monitoring systems, enabling the settings adjustments accessible from anywhere by clients. Besides machines, the company offers its wide expertise from consultancy to logistics services for the fertilizer industry.

AFRICAFERTILIZER.ORG PARTNERS

The International Fertilizer Development Center (IFDC) is a public international organization operating across Africa and Asia. IFDC uniquely approaches the global issues of food security and poverty by bridging the gap between research and impact, combining science-based innovations, inclusive market systems development, an enabling policy environment, and strategic partnerships to assist farmers and countries to identify and scale sustainable agricultural solutions, including improved nutrient use efficiency. These approaches are needed to boost soil health and crop productivity while reducing the environmental impact of fertilizer use.

IFDC translates research into action by using locally driven, environmentally sound, and impact-oriented solutions. With our partners, we seek to close the yield gap, eradicate global hunger, safeguard the soils on which our lives depend, and generate economic resilience for farming households and the countries in which they live.

The International Fertilizer Association (IFA) was founded in 1927 and is the only global fertilizer association with a membership of 480 companies in 68 countries. 45% of IFA's membership are based in developing economies and represent 75-80% of global fertilizer production. IFA members include fertilizer producers, traders and distributors as well as their associations, service providers to the industry, research organizations, and non-governmental organizations (NGOs).

IFA's vision: Productive and sustainable agricultural systems contribute to a world free of hunger and malnutrition.

IFA's mission: IFA promotes the efficient and responsible production, distribution and use of plant nutrients.

IFA's approach: IFA provides a framework for exchange and collaboration among its members on areas of common interest, and a structure for agreeing on common positions.

West African Fertilizer Association
Association Ouest-Africaine
de l'Engrais

The West African Fertilizer Association (Wafa) is the umbrella association of private sector players of the West African fertilizer industry, including fertilizer manufacturers, importers, blenders and traders. The association serves as a platform for cooperation amongst its members in the quest to champion the development of the fertilizer sector in the region as a means of improving agricultural production and food security of the ECOWAS member states.

The vision of Wafa is to effectively bring together all professionals in the fertilizer sector to have a common voice and action towards promoting sustainable, rational and efficient use of fertilizer in agriculture within the ECOWAS region. Formally inaugurated in 2016 and governed by a nine-member board, the association has rapidly grown in size and function and has become the voice of the private sector of the fertilizer industry. The members of the association represent over 85% of the fertilizer trade in West Africa.

**Manufacturer of Blending,
Bagging and Transport equipment**

Shamrock Blender

- * Capacity of 25 to 70 ton/m³ per hour.
- * Machine size 4,5-5,4-7-9-11,5-14 ton.
- * Easy and gentle blending process.
- * Blending and weighing are separated.

Weighcont Blender

- * Capacity of 20 to 200 ton per hour
- * Unlimited number of hoppers.
- * Computer controlled.
- * Custom built.

Small Bag Portable Container

- * In two 20 foot/6 meter containers
- * Capacity 80 to 100 ton per hour
- * 1800 bags of 25 or 50 kg per hour

Portable Container FIBC Big Bag Fill System

- * Capacity: 150 ton per hour: 250 big bags of 500-600 kg or 120 bags of 1000 -1500 kg per hour.
- * Easy to install on any decided place.
- * Usable at ship discharging places or inside buildings.

Small Bag Environmental Closed

- * 25 to 50 kg bagging system, fully closed, with two weighing scales.
- * Automatic bag fill system for 15 to 50 kg bags.
- * Capacity is 40 to 50 ton per hour, 800 to 1000 bags per hour.
- * Completely dust closed.

Vertical Blender

- * Capacity of 20 to 60 ton/m³ per hour
- * Machine size 5.5 - 7 - 9- 11.5 and 14.5 ton/m³ per batch.

Small Bag Portable Container

- * In two 10 foot/3 meter containers.
- * Capacity 45 ton per hour.
- * 900 bags of 25 or 50 kg per hour.

High Speed Bagging Line

- * For big bags - jumbo bags.
- * Capacity 50 to 70 ton m³ per hour.
- * 120 kg to 1250 kg bags.
- * Suitable for granular and powder materials.
- * Available with dust reducing system.

INTRODUCTION

This register of Fertilizer Manufacturing and Processing facilities in SSA monitors and maps all functional fertilizer producing plants, indicating the available name-plate production capacity in the region. The register also captures information on upcoming projects on fertilizer plant installations (within the next 2 years).

- **Manufacturing plants:** Those which undertake some type of chemical reaction to produce fertilizer. Typically, these are large specific product plants such as Urea, Ammonium Nitrate, Phosphoric Acid plants, etc.
- **Processing plants:** Those which use pre-manufactured products to formulate products for end use. Typically, these are blending and steam granulation plants.

For the 4th edition, the fertilizer plant data was updated between November 2019 and January 2020. A total of 14 manufacturing and 87 processing fertilizer plants were mapped, and 35 new facilities are expected to be installed by 2021 in the region. In addition, 15 organic fertilizer producing plants were mapped.

Information on all plants listed in this register can be found on the AfricaFertilizer.org official website: www.africafertilizer.org. Additional plants have been mapped using public information but have not been listed in this register.

SUMMARY OF PLANTS BY REGION

Region	Manufacturing	Processing	Organic	New	Total
East and Southern Africa	7	31	1	6	45
West and Central Africa	7	56	14	29	106
GRAND TOTAL	14	87	15	35	151

OVERVIEW OF FERTILIZER PLANTS IN SUB-SAHARAN AFRICA

MANUFACTURING PLANTS

There are 14 fertilizer manufacturing plants in SSA producing Nitrogen-based and Phosphate-based fertilizers. Also included in this category are plants producing lime supplements, micronutrients and organic fertilizers.

NITROGEN

Notore Chemical Industries Limited and Indorama Eleme Fertilizer & Chemicals Limited, both in Rivers State, Nigeria, are currently the only plants producing Urea in SSA. Other plants producing Nitrogen-based fertilizers currently import Ammonia to manufacture Ammonium Nitrate and Ammonium Nitrate-based fertilizers, and Ammonium Sulphate. They include International Raw Materials (IRM) producing Ammonium Sulphate in Madagascar, and Sable Chemical Industries Limited producing Ammonium Nitrate in Zimbabwe.

PHOSPHATES

There are 5 operational phosphates mines in SSA, involved in the production of Phosphate Rock and phosphate-based fertilizer compounds. They are Toguna Agro Industries in Mali, Industries Chimiques du Sénégal (ICS) in Senegal, Société Nouvelle des Phosphates du Togo (SNPT) in Togo, Minjingu Mines & Fertilizer Limited in Tanzania, and Zimbabwe Phosphate Industries Limited (ZIMPHOS) in Zimbabwe. These are all involved in the production of Phosphate Rock and phosphate-based fertilizer compounds.

Other plants producing phosphate-based fertilizers, i.e. SSP/TSP/DAP/MAP, include Kel Chemicals in Kenya.

POTASH

Currently, there are no potash manufacturing facilities in SSA.

PROCESSING PLANTS

There is an installed blending capacity ranging from 10 mtpy to 200 mtpy, and a granulation capacity of approximately 766,000 mtpy. These capacities are based on nameplate capacities. In 2019, we reported 80 fertilizer processing plants, but this year we have seen a slight rise in operational plants, up to 87 facilities in total. The increase has primarily taken place in West Africa.

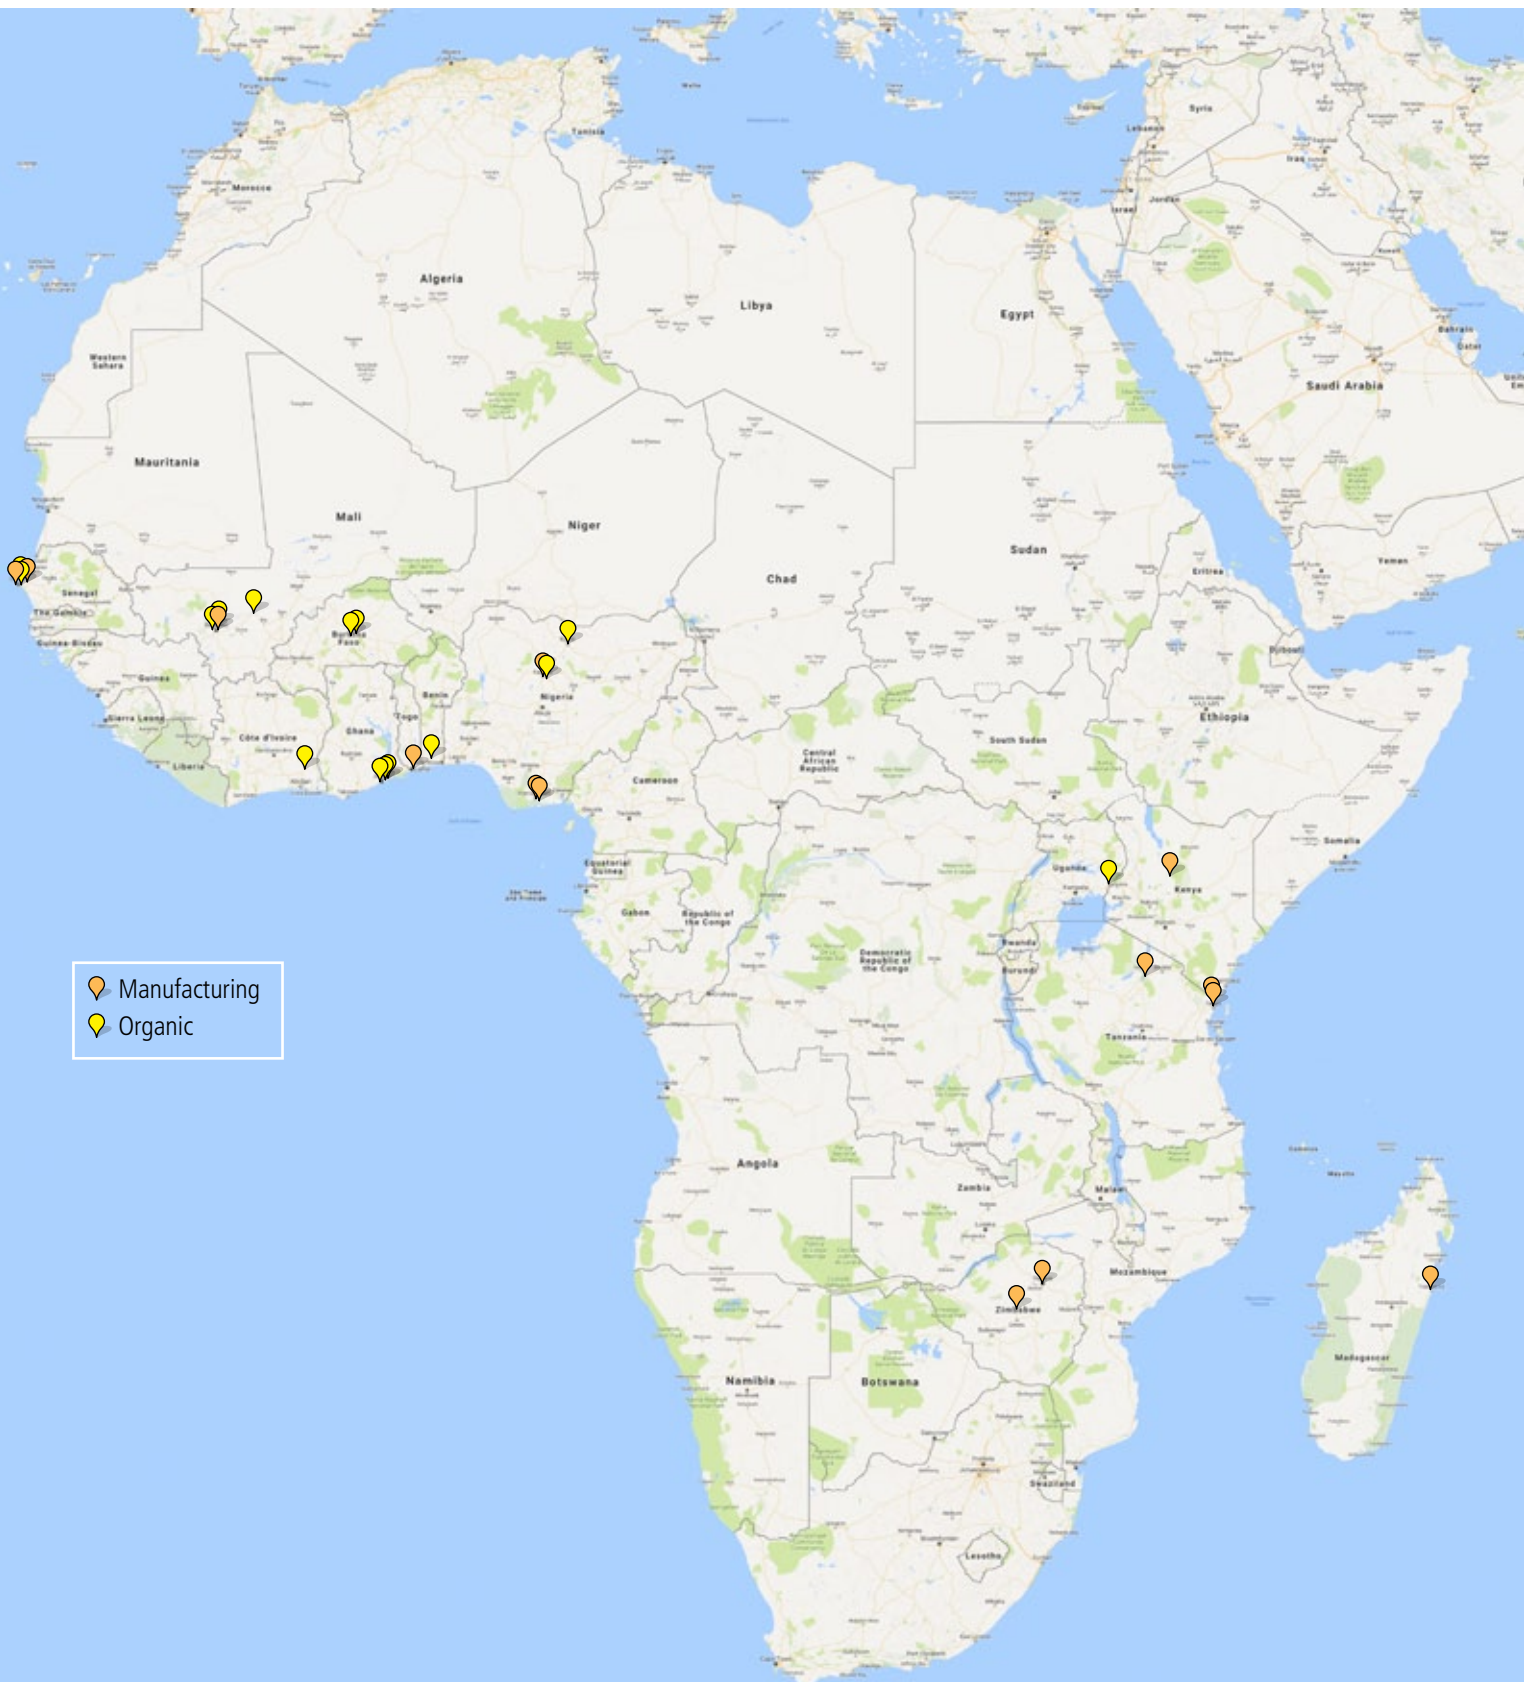

SUMMARY TABLES

Tables 1, 2, 3 and 4 provide a summary of all the fertilizer manufacturing facilities in SSA by nutrient categories.

Table 5 provides a summary of all proposed fertilizer manufacturing and processing facilities that are scheduled for installation and operation within the next 2 years.

Table 6 and 7 provide a summary of all the fertilizer processing facilities in SSA.

MANUFACTURING PLANTS IN SUB-SAHARAN AFRICA

PROCESSING PLANTS IN SUB-SAHARAN AFRICA

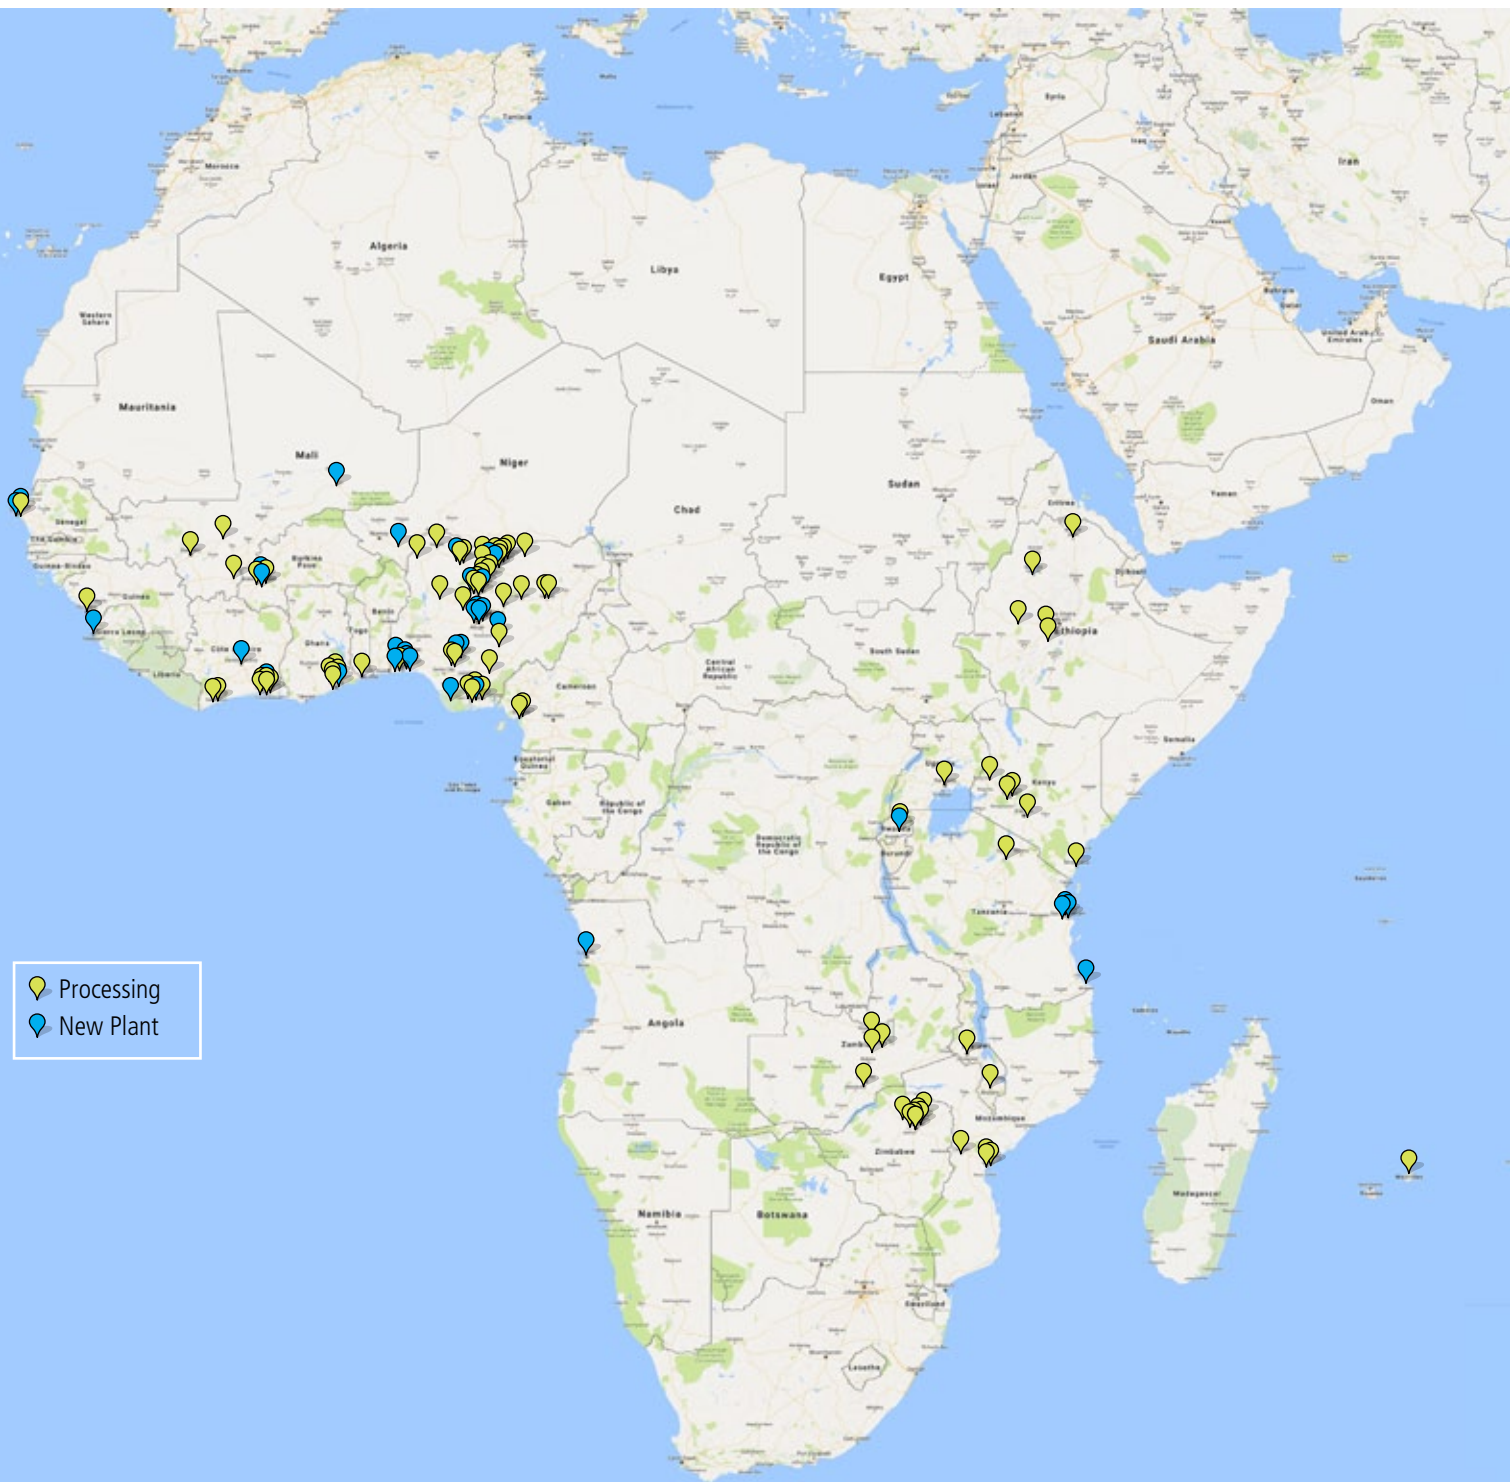

Table 1. Nitrogen manufacturing facilities in SSA

#	Country	Plant Site	Company	Product	Year Est.
1	Madagascar	Toamasina	International Raw Materials (IRM)	Ammonium Sulphate	2012
2	Nigeria	Onne, Rivers State	Notore Chemical Industries Plc	Urea	1988*
3	Nigeria	Port Harcourt	Indorama Eleme Fertilizers & Chemicals Ltd	Urea	2016
4	Zimbabwe	Kwekwe	Sable Chemical Industries Ltd	Ammonium Nitrate	1969

* 1988 as Nafcon, 2005 as Notore

AfricaFertilizer.org

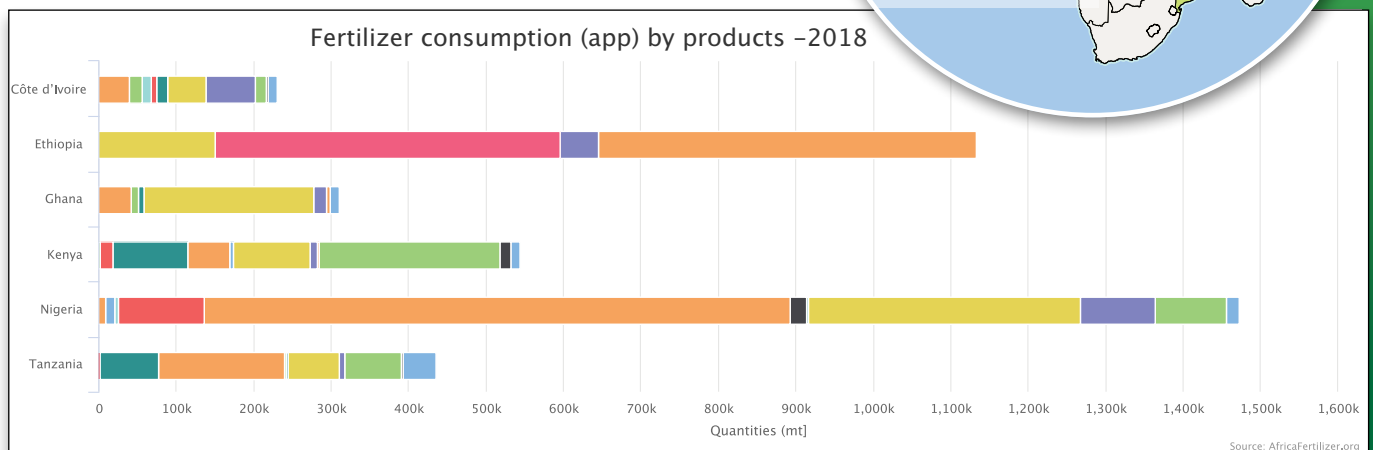

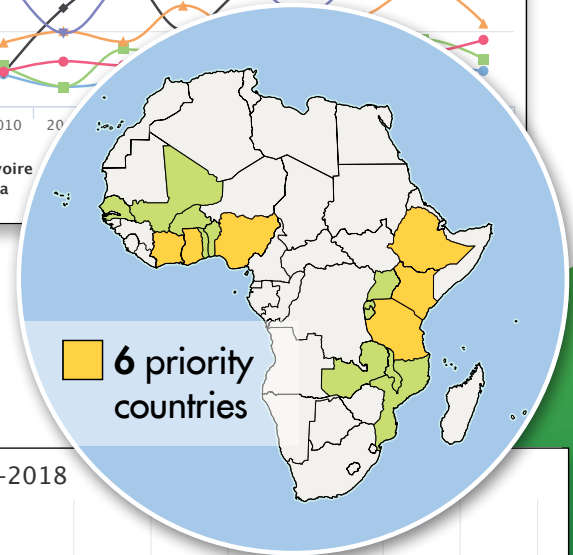

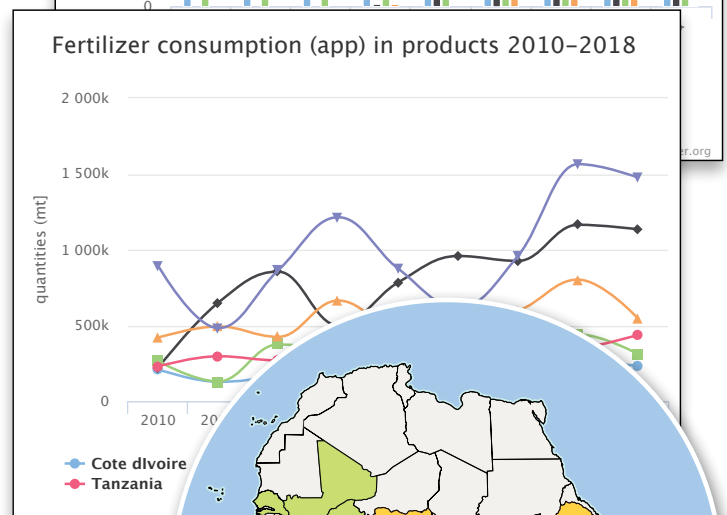

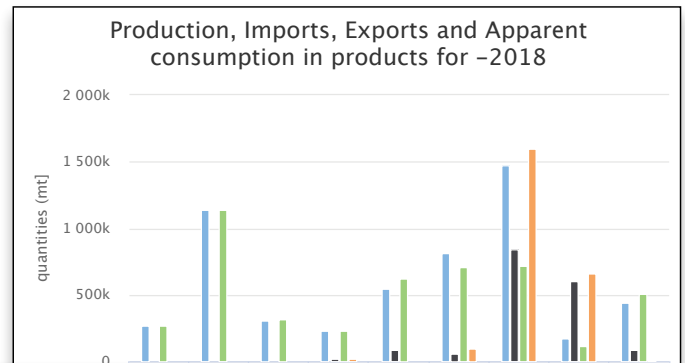

TO FEED OUR PEOPLE WE MUST FIRST FEED OUR SOIL

AfricaFertilizer.org (AFO) is an initiative whose objective is to provide clear, relevant and opportune data and market information on fertilizers in the SSA region, with an aim to support the implementation of continental, regional and national agricultural and more specifically fertilizer policies and regulations, and promote the growth and development of competitive markets, to the benefit of both the public and private sector, and fertilizer stakeholders globally.

The AFO initiative was conceptualized in 2009 by the International Fertilizer Development Center (IFDC). It has been implementing activities across the Sub-Saharan African region with support and funding from the International Fertilizer Association (IFA), the Africa Fertilizer and Agribusiness Partnership (AFAP), and a partnership with the Food and Agriculture Organization of the United Nation (FAO) through its CountrySTAT program.

AfricaFertilizer.org relies on and interacts with major international databases such as FAOSTAT, IFADATA, the World Bank, fertilizer intelligence agencies and several regional and national agro-input market information systems and public institutions as a source for secondary data and market information.
