# AfricaFertilizer.org

## TO FEED OUR PEOPLE WE MUST FIRST FEED OUR SOIL

The **AfricaFertilizer.org (AFO)** initiative is the premier source for fertilizer statistics and information in Africa. Set up in 2009, AFO is hosted by the **International Fertilizer Development Center (IFDC)** and supported by several partners, including the **International Fertilizer Association (IFA)**, on fertilizer trade and fertilizer use by crop studies, **Development Gateway (DG)** as partner for data visualization, and **Argus Media** as partner for international fertilizer prices, comments, and reports.

AFO seeks to provide clear, relevant, and opportune data and market information on fertilizers in the sub-Saharan African region, to support the implementation of continental, regional, and national agricultural and more specifically fertilizer policies and regulations, and promote the growth and development of competitive markets, to the benefit of both the public and private sector, and fertilizer stakeholders globally.

AFO has been working closely with the **Feed the Future Enhancing Growth through Regional Agricultural**

**Inputs Systems (EnGRAIS)** project, implemented by IFDC, and the **West Africa Fertilizer Association (WAFA)** in collecting, processing, and publishing fertilizer production, trade, and consumption statistics and prices for the main fertilizer markets in West Africa.

Currently, AFO has a five-year partnership agreement with WAFA to work on fertilizer statistics and prices in West Africa, and a three-year partnership with DG to develop the **Visualizing Insights on Fertilizer for African Agriculture (VIFAA)** dashboard for [Ghana](#), [Nigeria](#), and [Kenya](#), as well as provide price information on some 14 countries in West Africa and East and Southern Africa. The dashboards are currently being expanded into Ethiopia, Senegal, Zambia, Malawi and Mozambique.

AFO publishes the monthly **FertiNews e-newsletter** to provide up-to-date information on the fertilizer industry in Africa.

West African Fertilizer Association  
Association Ouest-Africaine  
de l'Engrais

The **West African Fertilizer Association (WAFA)** is the umbrella association of private sector players of the West African fertilizer industry, including fertilizer manufacturers, importers, blenders, and traders. The association serves as a platform for cooperation amongst its members to find sustainable solutions to fertilizer market challenges and promote best practices in fertilizer production and use to optimize the potential for crop production and food security of the ECOWAS Member States. Formally inaugurated in 2016 and governed by a nine-member board, the association has rapidly grown in size and function and has become the voice of the private sector of the fertilizer industry. The members of the association represent over 85% of the fertilizer trade in West Africa.

**Development Gateway (DG)** develops tools, processes, and custom analyses to make development data easier to gather, access, use, and understand. As an international non-profit organization with nearly two decades of experience across more than 70 countries in the Americas, Africa, Asia, and Europe, DG's clients and partners are key players in the data and international development space. DG is the lead implementer of Visual Insights on Fertilizer for African Agriculture (VIFAA), a four-year program funded by the Bill & Melinda Gates Foundation. DG is developing custom country dashboards and a new AFO portal through VIFAA, supporting AFO's growth into the leading provider of fertilizer data and information for sub-Saharan Africa.

## SPONSORS OF THE 6TH EDITION

**AGI** is a global leader in the planning, engineering and manufacturing of full solutions and systems across 5 platforms: Grain, Fertilizer, Food, Feed and Seed. We partner with our customers on 6 continents to leverage the AGI advantage and engineer unique market specific systems.

AGI produces custom blending and conveying equipment for industrial and fertilizer applications in a variety of capacities. The Yargus equipment line includes premium batch blending and material handling for dry materials, including declining weight systems, tapered vertical blenders, rotary drum blenders, tower blenders, bucket elevators, and multiple conveying options.

Based in the Netherlands, **EMT** is a global supplier of blending, bagging, coating and transport equipment for fertilizer industry, EMT has installed more than 500 machine lines in 74 countries, including more than 20 countries on the African Continent. All machines are tailor-made to meet the precise requirements of the customer's set-up. With the possibility to place blending and bagging lines inside containers, the user has a lot of flexibility to place and replace the machines.

EMT's customers include producers, exporters, importers, distributors and wholesalers of fertilizers or bulk products.

**Bagtech** started its journey in the 80's in African agribusiness industry, and nowadays with more than 35 years of expertise, the company is a market leader in supplying fertilizer machines equipped with online control, through Bagtech Automation System, in the African continent. We have reached over 120 successful projects delivered and more than 40 consulting and services offered across Africa and the World.

The company offers a wide range of products and solutions for bagging, blending, coating, screener, compact and mobile plants as per customer needs. All machines provide live & online monitoring system enabling to change settings accessible from anywhere on your laptop. Besides machines, the company offers handling fertilizer services from consultancy, management and stock control of full operation.

**Shamrock Blender**

- \* Capacity of 25 to 70 ton/m<sup>3</sup> per hour.
- \* Machine size 4,5-5,4-7-9-11,5-14 ton.
- \* Easy and gentle blending process.
- \* Blending and weighing are separated.

**Weighcont Blender**

- \* Capacity of 20 to 200 ton per hour
- \* Unlimited number of hoppers.
- \* Computer controlled.
- \* Custom built.

**Small Bag Portable Container**

- \* In two 20 foot/6 meter containers
- \* Capacity 80 to 100 ton per hour
- \* 1800 bags of 25 or 50 kg per hour

**Portable Container FIBC Big Bag Fill System**

- \* Capacity: 150 ton per hour: 250 big bags of 500-600 kg or 120 bags of 1000 -1500 kg per hour.
- \* Easy to install on any decided place.
- \* Usable at ship discharging places or inside buildings.

**Small Bag Environmental Closed**

- \* 25 to 50 kg bagging system, fully closed, with two weighing scales.
- \* Automatic bag fill system for 15 to 50 kg bags.
- \* Capacity is 40 to 50 ton per hour, 800 to 1000 bags per hour.
- \* Completely dust closed.

**Vertical Blender**

- \* Capacity of 20 to 60 ton/m<sup>3</sup> per hour
- \* Machine size 5.5 - 7 - 9- 11.5 and 14.5 ton/m<sup>3</sup> per batch.

**Small Bag Portable Container**

- \* In two 10 foot/3 meter containers.
- \* Capacity 45 ton per hour.
- \* 900 bags of 25 or 50 kg per hour.

**High Speed Bagging Line**

- \* For big bags - jumbo bags.
- \* Capacity 50 to 70 ton m<sup>3</sup> per hour.
- \* 120 kg to 1250 kg bags.
- \* Suitable for granular and powder materials.
- \* Available with dust reducing system.

# INTRODUCTION

This Register of Fertilizer Manufacturing and Processing Facilities in sub-Saharan Africa (SSA), excluding South Africa, monitors and maps all operational fertilizer producing plants, indicating the available name-plate production capacity in the region. The register also captures information on upcoming projects on fertilizer plant installations. The details are obtained by AfricaFertilizer.org (AFO) directly from fertilizer companies by use of questionnaires or from secondary data.

- **Manufacturing plants:** These are plants which undertake some type of chemical reaction to produce fertilizer. Typically, these are large specific product plants such as Urea, Ammonium Nitrate, Phosphoric Acid plants, etc.
- **Processing plants:** These are plants which use premanufactured products to formulate final products for end use. Typically, these are blending and steam granulation plants.

- **Organic plants:** These are plants that derive fertilizers from animal matter, animal excreta (manure), human excreta, and vegetable matter.
- **New projects:** These are either manufacturing or processing plants under construction or likely to be operational within the next five years.

For the 6<sup>th</sup> edition, the fertilizer plant data was updated between November 2021 and January 2022. A total of 19 fertilizer manufacturing plants and 117 fertilizer processing plants were mapped. 21 new facilities are expected to be installed in the region within the next 5 years. In addition, 20 organic fertilizer producing plants were also mapped. Information on all plants listed in this register can be found on the AFO official website: [www.africafertilizer.org](http://www.africafertilizer.org). Additional plants have been mapped using public information but have not been listed in this register.

## SUMMARY OF PLANTS BY REGION

Region	Manufacturing	Processing	Organic	New	Total
East and Southern Africa	8	37	3	5	53
West and Central Africa	11	80	17	16	124
<b>GRAND TOTAL</b>	<b>19</b>	<b>117</b>	<b>20</b>	<b>21</b>	<b>177</b>

# OVERVIEW OF FERTILIZER PLANTS IN SUB-SAHARAN AFRICA

## MANUFACTURING PLANTS

There are 19 fertilizer manufacturing plants in SSA, excluding South Africa, out of which 5 produce nitrogen-based products and 9 produce phosphate-based products. Also included in this category are 4 plants producing lime supplements and 1 plant producing micronutrients. 20 other plants producing organic compost and fertilizers have also been mapped.

### Nitrogen

Notore Chemical Industries Limited and Indorama Eleme Fertilizer & Chemicals Limited (located in River State) and Dangote Fertilizer Limited (located in Lagos) are currently the only plants producing urea in SSA, excluding South Africa. Other plants producing nitrogen-based fertilizers currently import ammonia to manufacture ammonium nitrate and ammonium nitrate-based fertilizers, and ammonium sulphate. They include Ambatovy producing ammonium sulphate in Madagascar as a byproduct of nickel production, and Sable Chemical Industries Limited producing ammonium nitrate in Zimbabwe.

### Phosphates

There are 8 operational Phosphates mines in SSA, excluding South Africa, involved in the production of phosphate rock and phosphate-based fertilizer compounds. They are *Société d'Exploitation des Phosphates du Burkina* (SEPB) in Burkina Faso, Toguna Agro Industries in Mali, *Industries Chimiques du Sénégal* (ICS) and *Société Minière de la Vallée du Fleuve* (SOMIVA) in Senegal, *Société Nouvelle des Phosphates du Togo* (SNPT) in Togo, Minjingu Mines &

Fertilizer Limited in Tanzania, and Zimbabwe Phosphate Industries Limited (ZIMPHOS) in Zimbabwe. These are all involved in the production of phosphate rock and phosphate-based fertilizer compounds.

Other plants producing phosphate-based fertilizers, i.e., SSP/TSP/DAP/MAP, include KEL Chemicals in Kenya.

### Potash

Currently, there are no potash manufacturing facilities in SSA, excluding South Africa, with some mines in Central Africa currently in the pre-feasibility phase.

## PROCESSING PLANTS

There is an installed blending capacity of individual plants ranging from 10 mtph to 200 mtph, and a granulation capacity of approximately 766,000 mtpy. These capacities are based on name-plate capacities. In this edition, we saw an increase in processing plants from 87 facilities in the previous edition to 101 facilities which has been primarily in West Africa.

## SUMMARY TABLES

Tables 1, 2, 3 and 4 provide a summary of all the fertilizer **manufacturing facilities** in SSA, excluding South Africa, by nutrient categories. Table 5 and 6 provide a summary of all the fertilizer **processing facilities** in SSA, excluding South Africa. Tables 7 and 8 provide a summary of all proposed fertilizer manufacturing and processing facilities that are scheduled for installation and operation within the next 5 years.

**Note:** Capacities are expressed in metric tons per hour (mtph), metric tons per day (mtpd), and metric tons per year (mtpy).

# AFRICAFERTILIZER.ORG OFFERS CURRENT MARKET DATA

**COVID-19 Africa Fertilizer Watch**  
November 2020 - All Countries

**Regional Highlights**  
East & Southern Africa Highlights

Lockdown status: With increased cases of infections, most countries have continued to relax the COVID-19 restrictions. In early September, Mozambique and Ethiopia ended their State of Calamity Emergency which was declared...

**26 JUNE 2020 - BULLETIN NO. 12**  
**WEST AFRICA FERTILIZER WATCH**  
PROVIDING WEEKLY INFORMATION ON THE IMPACT OF COVID-19 ON THE WEST AFRICA FERTILIZER MARKET

**HIGHLIGHTS**

- This twelfth issue is the last one dedicated completely to West Africa. From July 2020, a new Africa Fertilizer Watch will cover 28 countries across sub-Saharan Africa, including the 17 ECOWAS, UEMOA, and CILSS states of western Africa.
- The new initiative led by AfricaFertilizer.org has the support of the African Union, and a group of technical and financial partners, including BMGF, USAID, AFAR AGRA, WFP, IFP, and Development Gateway. An improved FertNews will provide the latest fertilizer prices and market news every month.
- The map below is a composite of the 11 maps published since April and shows we are now living in a "new normal". If COVID-19 preventive measures are maintained or reinforced, the priority is to ensure the free movement of agro-inputs within the ECOWAS region, and the timely supply of these inputs to the greatest number of farmers.
- Low fertilizer prices, effective subsidy and distribution programs for small farmers, coordinated responses by national governments and regional institutions, and favorable climatic conditions contribute to a 2020 growing season which looks relatively satisfactory for most of the countries despite COVID-19 (+25% new cases this week).
- In countries at higher risk, such as Niger, Sierra Leone, and Liberia, fertilizer unavailability, food and civil insecurity put the most vulnerable at high risk.

**STATUS**

Country	Covid-19	Public Measures	Status of fertilizer supply chain	Fertilizer Markets
BENIN	Green	Green	Green	Green
BURKINA FASO	Yellow	Yellow	Yellow	Yellow
CAPE VERDE	Green	Green	Green	Green
CHAD	Red	Red	Red	Red
COTE D'IVOIRE	Green	Green	Green	Green
